## Contact

🇪🇹 Ethiopian  
📅 Date of birth 12/07/2000  
👤 Single

Experienced MERN-STACK developer with a passion for writing optimized and efficient code. Proficient in Typescript, React, Nextjs, Node.js, and Tailwind CSS. An asset to any team with *excellent problem-solving skills and a drive for success. Seeking a challenging role as a web Developer where I can showcase my technical expertise and teamwork abilities. Let's build the future together*

## Work experience

### Frontend Developer, [The Wild Oasis](#) For Remote Client

From June 2023 to August 2023

Developed a custom-built Internal Hotel Management web Application That can serve as a central hub for hotel staff , providing them with the necessary tools to efficiently manage check-ins, handle reservations and deliver exceptional customer service.

### Backend Developer , [Natours](#) For Remote Client

From March 2023 to June 2023

Collaborated with a Team of developers to build The backend Api for A Tour and Travel agency. I have successfully implemented a RESTful Api powered by stripes check-out session.

## Education

## Programming Language

### Typescript

2 years of professional experience in JavaScript and building upon it to leverage the power of static typing.

### Python

Intermediate proficiency in Python, honed through practical application during ALX programming challenges

## Databases

### PostgreSQL

Used as a primary Relational database separately and in conjunction with Supabase

### MySQL

Utilized it well during my 3rd year web development course mainly with PHP

### MongoDB

Utilized a Remote MongoDB Atlas database for it's flexible schema design to efficiently store and manage dynamic data structures

### Redis

Currently expanding My knowledge in This Technology for its high-performance

## Frameworks

### Express

I have built **RESTful APIs** and implemented Robust security features to protect against common web vulnerabilities. I have ensured **Authentication** and **Authorization** with JWT

### React

I have developed Interactive **SPA's** that utilize **Redux** and **Context API** for Global state management and **React query** for data fetching and caching.

### Nextjs

I have been able to create web applications with the following Nextjs features : **SSR** **file-based routing**
